Summary

Software Engineer (Mobile Developer) with **2+ years of hands-on experience** in React Native, React.js, JavaScript, and TypeScript, specializing in building scalable, production-grade mobile applications and complex drag-and-drop systems.

Experienced in developing ERP-based applications, reusable component architectures, API integrations, and cross-platform mobile applications for Android & iOS. Skilled in **Redux Toolkit, RTK Query, Firebase, Push Notifications, Deep Linking, Authentication Flows, Performance Optimization, and Production Debugging**. Hands-on experience handling high-scale production applications with **1M+ users**, implementing scalable architectures, optimizing app performance, and resolving Android-specific issues across devices.

Actively leveraging **AI-assisted development tools such as Claude Code and agentic workflows** to accelerate development, improve code quality, and deliver high-impact features efficiently.

Skills

Frontend: React.js, React Native, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

State Management: Redux Toolkit, RTK Query, Redux Saga, Redux Persist, Context API

Mobile Development: Android, iOS, Firebase, Firebase FCM, Push Notifications, Silent Notifications, Deep Linking, App Deployment, Production Debugging

Backend & APIs: REST APIs, Axios, JWT Authentication, API Integration

Core Concepts: Drag-and-Drop Systems, Reusable Component Architecture, Performance Optimization, Cross-Platform Development, PDF Generation, IndexedDB

AI & Tools: Claude Code, AI-assisted Development, Agentic Workflows, Prompt Engineering, Git, GitHub, Node.js, react-rnd, html2pdf.js, DOMPurify

Experience

Software Engineer (Mobile Developer)

May 2024 – Present

Edunext Technologies Pvt. Ltd.

- Developed and maintained production-grade mobile applications using React Native and TypeScript
- Built a **Report Generator system** enabling dynamic creation of certificates, receipts, and ID cards
- Designed and implemented a **drag-and-drop template builder** for dynamic layout generation
- Worked on **Edunext Management App** for administrators managing student, employee, and finance data
- Handled production updates and bug fixes for **Parent (1M+ users), Teacher, and Student apps**
- Integrated APIs, authentication flows, push notifications, and Firebase-based services
- Debugged Android version-specific issues and ensured stable releases across devices
- Collaborated during school visits to gather real-world requirements and improve usability

Professional Projects

Drag-and-Drop Report & Template Builder

React js, TypeScript, Redux Toolkit

- Developed a scalable template builder for ID cards, reports, and certificates using drag-and-drop systems
- Engineered canvas editor with zoom mapping, dynamic sizing, and typography controls
- Implemented Undo/Redo state management with Redux Toolkit and IndexedDB persistence
- Built export engine for high-quality HTML and PDF generation using html2pdf.js
- Optimized rendering performance with image compression and secure rendering using DOMPurify

SimplyAdmission (School Admission System)

React Native, TypeScript

- Built the application from scratch, designing complete architecture and core building blocks
- Developed **50+ screens** with reusable and scalable UI components
- Implemented structured navigation, form handling, and API integration for admission workflows
- Designed modular and maintainable codebase to support future feature expansion

EduNext Management App (Admin ERP Dashboard)

- Built ERP dashboard for administrators to manage student, employee, and financial data
- Implemented modules for attendance, fee tracking, analytics dashboards, and reporting
- Developed scalable UI with API integration and dynamic data visualization

EduNext Parent App

- Handled production issues, feature requests, and bug fixes for a high-scale application
- Resolved Android-specific issues and improved application stability across devices
- Improved app performance and optimized user experience for large-scale usage

EduNext Teacher App

- Implemented features, UI improvements, and bug fixes across multiple modules
- Ensured consistent UI/UX across Teacher and Student applications

EduNext Student ERP (Web Dashboard) React, TypeScript, Vite, Redux Toolkit, Tailwind CSS

- Built a comprehensive **student-facing ERP web dashboard** with **5+ feature modules** across academics, communication, digital learning, finance, and parent corner
- Integrated **Highcharts** for analytics dashboards, **FullCalendar** for event calendars, and **Framer Motion** for smooth UI animations
- Implemented **lazy loading** with code splitting for all feature pages, optimizing initial load performance
- Set up **Redux Toolkit with Redux Persist** for global state management across auth, dashboard, quiz, and navigation slices
- Built theming system with CSS variables for dynamic theme switching and consistent design tokens

Education

Master of Computer Application (MCA) Correspondence	2024 – 2026
HI-Tech Institute of Engineering and Technology Bachelor of Computer Application (BCA)	2021 – 2024
Vishal International School (CBSE) Class XII – 78%	2020 – 2021

Certification

Full Stack Java Developer Program NASSCOM Certified	Oct 2023 – Dec 2023
---	---------------------
